

Potassium Phosphite Liquid Foliar Fertilizer

Boost plant health, resilience, and productivity with our premium potassium phosphite liquid foliar fertilizers. Designed for rapid absorption through foliage, these formulas deliver essential phosphorus (as phosphite) and potassium directly to plants, enhancing nutrient uptake, strengthening disease resistance, and improving stress tolerance. Ideal for a wide range of crops, our fertilizers are scientifically formulated to support vigorous growth and maximize yields.

Product Lineup:

	Nitrogen (N)	Phosphorus (P2O3)	Potassium (K2O)
0	525	275	
0	525	375	
0	525	270	
0	520	340	
0	420	280	

Key Features & Benefits:

Zero Nitrogen: Minimizes excessive vegetative growth, focusing energy on fruit/root development.

High Phosphite Content: Enhances plant immunity against fungal and bacterial pathogens.

Balanced Potassium: Improves drought tolerance, nutrient transport, and crop quality.

Rapid Absorption: Foliar application ensures quick delivery of nutrients during critical growth stages.

Versatile Use: Suitable for fruits, vegetables, cereals, and horticultural crops.

Why Choose Our Fertilizers?

Precision Formulations: Tailored ratios to meet specific crop needs.

Eco-Friendly: Low environmental impact with efficient nutrient utilization.

Easy Application: Compatible with most standard foliar spray systems.

Optimize your crop performance with our potassium phosphite solutions—science-backed nutrition for healthier, higher-yielding plants.
